

# Ponte de Roma

(Description from Distinctive Sewing Supplies, Oakville)

<http://www.distinctivesewing.com/ponte>

Ponte de Roma is a double-knit interlock fabric that has stability and firmness in addition to flexibility and softness. This means it can be used in dresses, blazers, pants, skirts and other structured pieces and will hold its shape but still maintain comfort and give. Ponte fabric has a subtle matte sheen and incredible soft drape.

Solid colours are the same on both sides. It is one of the easiest knits to sew and you don't have to finish the seams. The upshot is that it is very flattering on most figures. Be sure to pre-wash before cutting.

## Other Details

Content:

65% Rayon 30% Nylon 5% Spandex

Width:

148 cm / 58"
